

MAKING YOUR **FORKLIFT** WORK FOR YOU

A TEN MINUTE CHECKLIST FOR MANAGERS & SUPERVISORS

CHECKLIST

WorkCover NSW Health and Safety Checklist

WHAT IS THE CHECKLIST?

The purpose of this ten-minute checklist is to:

- assist you in maximising efficient and safe operation of forklifts in your business
- assist you in preventing injuries
- alert you to inefficient practices related to all powered trucks.

The checklist covers the four major areas of activities of forklift operations in your business.

These areas are:

- The forklift (pre-operation and operation) (Section 1)
- Work environment (Section 2)
- Work processes (Section 3)
- The operator (Section 4).

HOW SHOULD THE CHECKLIST BE USED?

The checklist is designed to be a trigger – to alert you to inefficient practices related to all powered trucks. It does not replace a thorough risk assessment of all your operations and does not include all the hazards related to the use of your forklifts.

It is recommended that you complete the checklist regularly, at least quarterly.

WHAT SHOULD I DO IF I FIND A PROBLEM WITH MY FORKLIFT OPERATIONS?

If a “no” answer is recorded, you have identified an area that may be causing inefficiencies or injuries/incidents in the workplace. Therefore you need to look more thoroughly at those issues by conducting a risk assessment and implementing appropriate control measures.

Sources of information that may assist you are provided on the back cover.

Answer each of the questions below, from Sections 1 to 4.
